- Prioritizing support for accreditation impacts
- Keeping everyone well-informed and educated
- Recently visited/briefed POTOs in both region
- Establishing relationship with ARRTC (ATRRS
- Maintaining relationships with DIV (IT) and R

Significant TASS Issues in TIE McCoy

- **Ammunition Management**
- **Reduced Resources**
- **CGSC Course Materials**

Ammunition Management

- **Issue:** Ammunition management problems are systemic / recurring
- **Discussion:** Problems encountered now were prevalent five year
  In general, the military community does not adhere to guidelines/p
  often overlooking basic management requirements:
    - Timelines are ignored and TIE approval is not considered
    - Requests are not submitted in a timely manner
    - Amounts requested are over/under authorized
    - Not a visible / recognized TIE mission (implied)
    - Title XIs must assist with ammunition management

  TIE McCoy briefs the importance of ammunition management and
  the issue when possible, but high personnel turnover at the user/cu
  is disruptive and leads to recurring problems.
- **Recommendation / Impact / Status:** Training is often hampered
by ammo problems. The importance of ammunition management, as
TIE's involvement, must be stressed to higher levels and even manag
ranking soldiers (at user level). DSCED may want to incorporate am
within the mission statement and raise its visibility in briefings/confe

Reduced Resources

- **Issue:** Inadequate TIE funding and personnel hampers mission success.
- **Discussion:** As a tri-component integrating agency, the TIE must work with numerous offices throughout the region. Personnel turbulence at the customer level and developing/evolving initiatives at a variety of other levels necessitates a proactive TIE. Greater visibility in a variety of forms is required not only to raise TASS awareness, but to also meet mission requirements. TIE McCoy currently needs more funding and personnel .
  - TIE's participation/attendance at various events is reduced
  - Diminished visibility degrades TASS awareness
  - TIE's ability to fulfill its mission is seriously hampered
  - Quarterly funding management prevents long-term planning
  - Situation lowers morale and increases frustration for all
- **Recommendation / Impact / Status:** The impact of recent budget reductions is uncertain but obviously negative. The TASS concept and program hinges on awareness, participation, and cooperation; thus, additional funds must be provided if TASS is to succeed. Further, the NGB must identify and assign an individual to replace MSG Knudson.

CGSC Course Materials

- **Issue:** M-course materials for IDT phases (Phases I & III) are distributed on a "pull" vs "push" system.
- **Discussion:** NRS only authorizes the release of M-course student materials upon receipt and validation of student enrollment forms (CGSC 59-Rs) and/or seminar rosters (CGSC 234-Rs). As M-course enrollment windows don't close until after the start date for the IDT phases, instructors are forced to either: 1) rely on often incomplete student materials available at the CGSC website for several seminar meetings until they can provide NRS all required 59-Rs and accurate rosters, or 2) submit incomplete documentation in time to get most of the student materials they will ultimately need, and process changes later as they occur. If they opt for the latter, the workload for all involved in the material distribution system are burdened with processing and tracking innumerous "partial issues", forcing instructors to tailor their instruction to accommodate students with different study materials for the first several class meetings.
- **Recommendation / Impact / Status:** That CGSC student materials, like instructor materials, be "pushed" to the designated primary instructors in the field (basis of issue: 16 sets per projected seminar) when available. The Instructors can request additional sets if required, or return unused sets.

TIE McCoy RCE Consolidation and Transition to New TDA Update / Issues

- **Europe MOA**
- **Additional costs due to consolidation**
- Transfer Evaluations 1 Feb
- Inprocess Region A soldiers at McCoy 1 Apr
- Leave processing 1 Apr
